The University of Arizona College of Medicine - Tucson is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The University of Arizona College of Medicine - Tucson designates this live activity for a maximum of 7.5 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Objective Outcomes

- Describe the role of, and utilize when appropriate, complete tumor sequencing in identification of targetable mutations in pancreatic cancer to guide management.
- Incorporate knowledge of the evolving role of circulating tumor- DNA (ct-DNA) in prognosis, decisions regarding adjuvant therapy and in detection of early recurrence.
- Employ criteria for vascular resection in pancreatic cancer.
- Identify pancreatic cystic lesions on cross-sectional imaging and recognize the high-risk stigmata and worrisome features that suggest the presence of cancer in these cysts.
- Describe histotripsy and recognize the potential of abscopal effect.
- Describe indications for evolving techniques in the treatment of metastatic colorectal cancer.
- Employ complex multidisciplinary discussions in patients with metastatic colorectal cancer given rapidly evolving treatment options that offer hope to patients with previously unresectable disease

Keynote Speakers

"Advances in the Management of Colorectal Liver Metastases: Resection, Hepatic Artery Infusion, Liver Transplant"

Flavio Rocha, MD, FACS, FSSO

Hedinger Professor of Surgery
Program Director, HPB Fellowship
Physician-in-Chief, Knight Cancer Institute,
Oregon Health & Science University

"Histotripsy: Hype or Hope"

Young Hong, MD, MPH, FACS, FSSO

Chief, Division of Surgical Oncology
Director of Cellular Therapy & Clinical Research
Director of Peritoneal Surface Malignancy Program
Division of Surgical Oncology, Department of Surgery
Cooper University Health Care
