

Neuroscience Grand Rounds 2024

Neuroscience Grand Rounds 2024 - 11/22/2024

November 22, 2024 – 8:00 AM

Tucson

Overall Activity Objectives:

- 1 Incorporate into practice current evidence-based practices to get patients with stroke the most appropriate treatment/intervention in the shortest time possible.
- 2 Incorporate disease modifying therapies into the treatment plan for individuals with multiple sclerosis based on the most current clinical research and professional society guidelines and the underlying science regarding mechanism of action.
- 3 Refer patients with epilepsy for non-pharmacological treatments sooner in their treatment paradigm.
- 4 Manage pregnant women with epilepsy based on the latest data and guidelines.
- 5 Evaluate patients with neuromuscular disease for the use of the latest treatments, based on evidence-based guidelines and publications.
- 6 Treat patients with migraine with the latest agents and strategies when traditional treatments fail.
- 7 Refer patients with Parkinson's disease and other movement disorders for neuromodulatory treatments sooner in their treatment paradigm.
- 8 Incorporate ethical constructs into the delivery of care and communication with patients and their families.
