

# Hepatopancreaticobiliary Tumor Board

## 2024

Weekly HPB Tumor Board 2024 - 12/6/2024  
December 6, 2024 – 7:00 AM  
Online

### Overall Activity Objectives:

- 1 Employ available treatment options and available clinical trials to address individual patient cases.
- 2 Utilize available non-surgical interventions in preparation for surgery, such as preoperative embolization for tumors, and possible GI interventions to help with diagnosis and preoperative chemotherapy.
- 3 Utilize neoadjuvant therapy when appropriate and describe its role in the management of borderline resectable pancreatic cancer.
- 4 Identify pancreatic cystic lesions on cross-sectional imaging, and recognize the high-risk stigmata and worrisome features that suggest the presence of cancer in these cysts.
- 5 Implement the various techniques (percutaneous, endoscopic, surgical) for managing acute peripancreatic fluid in necrotizing pancreatitis.
- 6 Locate clinical trials to help with preoperative and postoperative care and provide the patient with a comprehensive approach.
- 7 Utilize available resources better, such as appropriate referrals and use of ancillary services for coordination of care.
