**“Impact of GH and IGF-I on Visceral fat and Glucose Metabolism:
Lessons Learnt Through the Years.”**

Kevin Yuen, MBChB, MD FRCP(UK), FACE, FEAA

Medical Director Barrow Pituitary Center
Medical Director Barrow Neuroendocrinology Clinic

Professor of Medicine
University Arizona College of Medicine, Phoenix
Creighton University School of Medicine

Objectives:

- 1) Describe the effects of changes of GH-induced body composition on glucose metabolism.
- 2) Identifying the mechanisms responsible for individual sensitivity to GH replacement in adults with GHD.
- 3) Utilizing evidence-based guidelines and algorithms to diagnose and treat adult GHD.

This session will be open to clinicians, residents, students, and all others.

Accreditation Statement:

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of The University of Arizona College of Medicine - Tucson and The University of Arizona College of Medicine-Phoenix. The University of Arizona College of Medicine - Tucson is accredited by the ACCME to provide continuing medical education for physicians. The University of Arizona College of Medicine - Tucson designates this live activity for a maximum of 1.0 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Disclosure Statement(s): CME Planning Committee Members and the CME Office Reviewers have disclosed that they have no relevant financial relationships with ineligible companies that would constitute a conflict of interest concerning this CME activity.
