

Endocrinology, Diabetes & Metabolism Didactic Series, 2024 Thyroid Eye Disease

September 24, 2024 – 3:00 PM
Tucson

Overall Activity Objectives:

- 1 Discuss current guidelines for diagnosis and treatment of diabetes and endocrine disorders encountered in clinical practice
- 2 Evaluate the typical clinical features of common or rare endocrine diseases
- 3 Identify at-risk patients who should be screened for endocrine conditions
- 4 Select appropriate diagnostic tests for patients with possible endocrine disorders, based on published clinical guidelines and other current research findings.
- 5 Choose evidence-based, cost-effective therapeutic options for patients with endocrine disorders
- 6 List common causes or risk factors for diabetes, endocrine, and metabolic disorders and choose appropriate strategies of therapy

Session Objectives:

- 1 To recognize the signs of thyroid eye disease
- 2 To interpret the results of recent treatment trials for thyroid eye disease
- 3 To formulate treatment plans for patients with thyroid eye disease
